Universidad de Navarra

ACADEMIC YEAR 2026–27

Welcome to Data Drivers

One year, one certification, one research project of your own.

WHAT WE ASPIRE TO

By the end of the year, every member will have

1. A certification

Completed DataCamp's **Data Analyst in Python** career track and earned its Statement of Accomplishment.

2. A research project

Investigated a topic of personal interest using the tools learned in class, and presented the results to the club.

THE COMMON FOUNDATION

Data Analyst in Python

Mandatory for every member by the end of the year.

It is the baseline for anyone who aspires to do research with data: Python, pandas, statistics and visualisation.

app.datacamp.com/learn/career-tracks/data-analyst-with-python

01 Introduction to Python

02 Intermediate Python

03 Data Manipulation with pandas

04 Joining Data with pandas

05 Introduction to Statistics in Python

06 Data Visualization with Seaborn

07 Exploratory Data Analysis in Python

08 Sampling in Python

09 Hypothesis Testing in Python

TWO GROUPS, ONE SESSION

Where do you fit?

Foundations

Little or no programming experience

- Follow the track: one course per class week, at home
- Practise and ask questions in class
- Project: a data analysis on a dataset you choose

Advanced

Already comfortable with Python

- Also complete the certification
- Take turns as tutor for the Foundations group
- Project: an investigation, alone or in a team of up to 3

Foundations members can move up to Advanced at the semester break.

HOW A CLASS WORKS

Three roles in every session

Every member

Completes that week's DataCamp course at home, before class.

Tutor

An Advanced member, rotating every one or two weeks. Explains the course and solves the exercises live.

Moderator

The club coordinator. Guides the session and answers your questions.

Tutoring is the first step into the **formative side of the club**, and every participant earns extra credits.

LEADERSHIP THROUGH THE YEAR

From one lead to a team of tutors

SEMESTER 1 · OCT – NOV

The coordinator leads

I lead the classes and progressively delegate sessions to the Advanced group.

SEMESTER 2 · JAN – APR

Advanced tutors lead

Tutors take the classes in rotation; I act as moderator and question solver.

RECOGNITION

Two ways to earn extra credits

Help in formative sessions

Act as tutor or support the Foundations group during classes.

3

Present a well-developed project

Only the three best projects of the year receive this recognition.

Condition: credit candidates must attend every project meeting, or justify their absence.

PROJECT MEETINGS

Every three weeks, we meet about projects

The regular class is replaced by a joint session: everyone shows their progress and receives feedback from the club.

Mandatory for credit candidates

Any absence must be explained to the coordinator in advance.

Meeting	Week
#1	Oct 26 – 30
#2	Nov 16 – 20
#3	Jan 25 – 29
#4	Feb 15 – 19
#5	Mar 8 – 12
#6	Apr 12 – 16
Showcase	Apr 19 – 23

3

ATTENDANCE POLICY

Members who accumulate three absences will forfeit their membership in the club.

- Attendance is recorded at every session, including project meetings.
- A formal notice will be issued after the second absence.
- If you cannot attend, please inform the coordinator before the session.
- Exam periods and official breaks are not counted.

KEY DATES

We start the week of 12 October

Oct 12

First class

Dec 1 – Jan 8

Exams and Christmas: no classes

Jan 11

Classes resume

Feb 22 – 26

Last course: track complete

Mar 22 – Apr 2

Holy Week: no classes

Apr 19 – 23

Final showcase

No classes during exam periods (Apr 26 – May 18 and re-sits in June). Solid line: class weeks · dashed line: no classes.

SCHEDULE

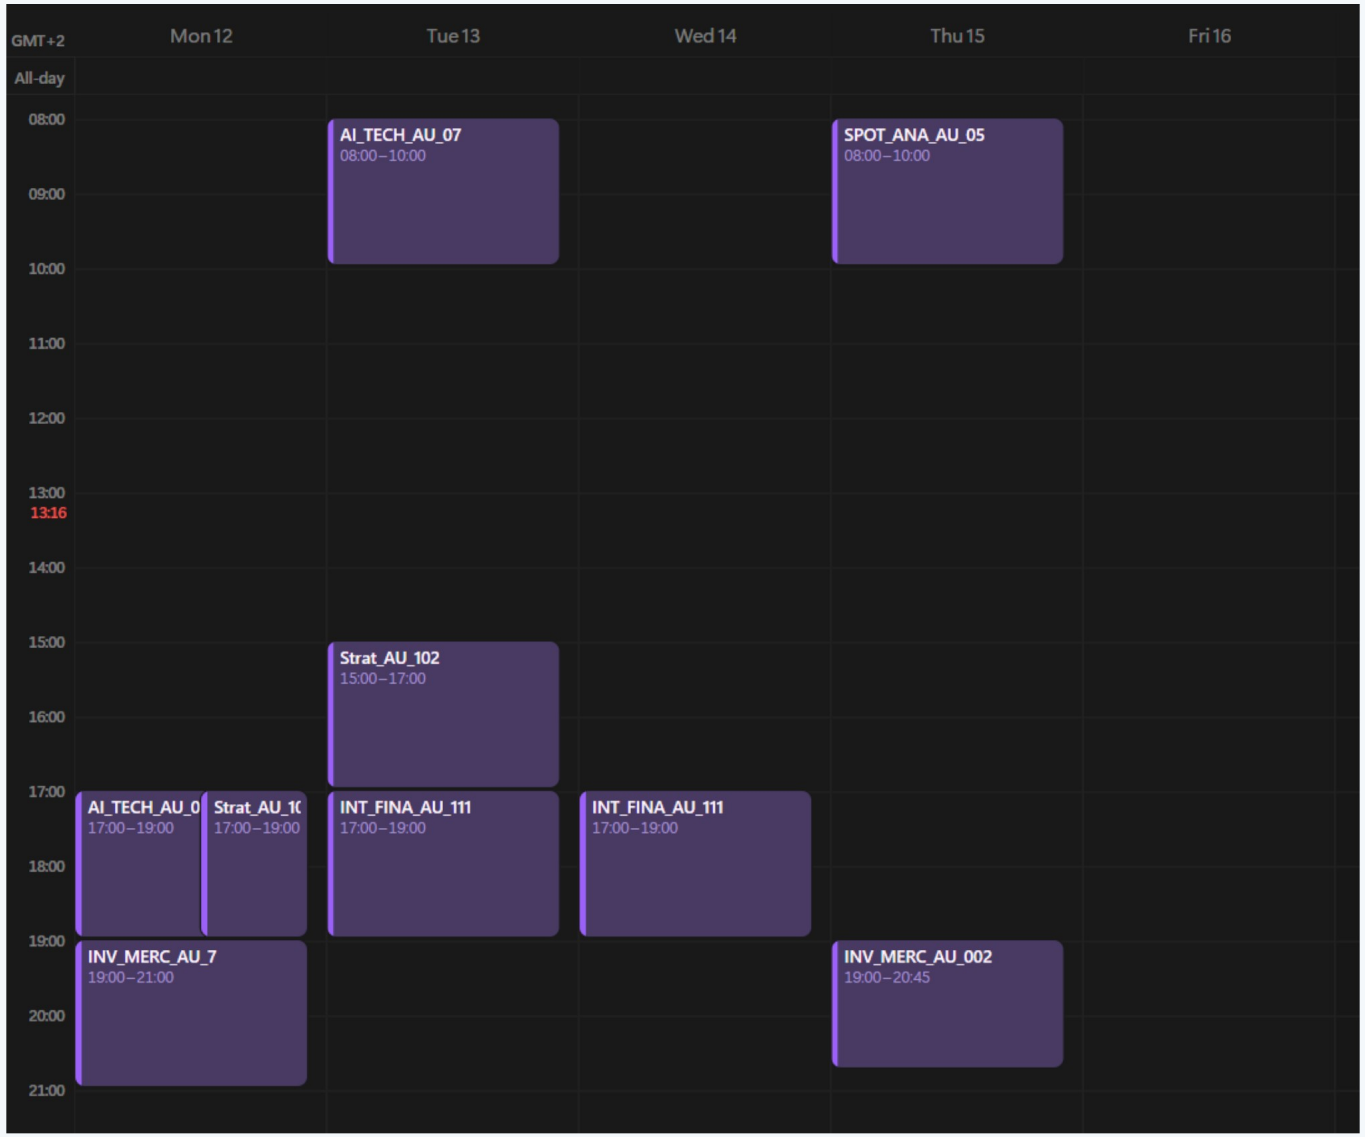

Let's choose the day and time together

Options under consideration

Wednesday · 19:00

Thursday · 15:00 – 18:45

Times may not suit everyone, but we ask every member to make the effort to attend all classes of the track.

REGISTRATION

Send us your details, if you haven't yet

01
Full name

02
Email

03
GitHub username

04
DataCamp email

datadriversunav@gmail.com

So we can invite you to the DataDriversUNAV GitHub organization and to DataCamp.

SEE YOU THE WEEK OF 12 OCTOBER
